MIL-DTL 16878/15 was specifically designed for Military Installation & Applications. It is a high performance wire built to handle the increasingly adverse environments. It is an irradiation cross-linked polyolefin with impressive properties. It significantly reduces wire and harness routing headaches because it is more heat resistant, tougher and more fluid resistant than TXL.

MIL-DTL 16878/15 is rated at 125°C, but it survives temperatures to 240°C and higher. It is safer in overload conditions because it will not melt.

MIL-DTL 16878/15 creates opportunities to eliminate unnecessary and expensive convolute tubing, tapes and heat shields that protect inferior wire systems.

MIL-DTL 16878/15 has a life expectancy over 10,000 hours @ 125°C.

MIL-DTL 16878/15 processes very well on automated high speed cut and strip equipment. The end result being a Military Application wire ideally suited to applications where heat protection, long life and less expensive wiring harnesses are required.

### Benefits and Features
- M16878/14 Rated 125°C 600 V
- Exceeds SAE J1678 “W” Requirements
- Cold temperature performance to -55°C
- Excellent Cut-Through Resistance
- Excellent Abrasion Resistance
- Very Fluid Resistant
- RoHS Compliant

### Applications
- Including but not limited to:
  - Legacy Military Equipment
  - Legacy Military Vehicles
  - Powertrain
  - Under Hood
  - Locations near exhaust manifolds or other high temperature areas
MIL-DTL 16878/15
