

European Union REACH Legislation & Champlain Cable Corporation's Position

The European Union chemicals legislation, **REACH** (Registration, Evaluation, Authorization, and Restriction of Chemicals) has many requirements and deadlines, all of which are administered through the European Chemicals Agency (ECHA). This document serves to outline Champlain Cable Corporation's obligations under REACH and how our products comply with directives from the ECHA.

Champlain Cable is considered an *article* producer under REACH guidelines. "Article means an object which during production is given a special shape, surface or design which determines its function to a greater degree than its chemical composition;" (REACH, Article 3(3)). As an article producer it is our understanding that Champlain Cable or importers of articles [as defined by the REACH legislation EC No 1907/2006, Article 3 (1-3)] made by Champlain Cable are **not** obligated to register chemical substances contained in the article unless:

- A substance (total quantity over 1 metric ton/year) is intended to be released from the article during normal or reasonably foreseeable conditions of use [Article 7.1]; or,
- Said article contains a Substance of Very High Concern (SVHCs) at a level of 1 metric ton/year or a concentration of 0.1% by weight [Articles 7.2].

Our articles do not release substances during normal conditions of use. Furthermore, based on the information provided to Champlain Cable by its raw material suppliers and our own internal review, Champlain Cable's articles do not contain any of the now **201** Substances of Very High Concern (SVHCs) listed as of **July 16, 2019**. Therefore, we can certify that we do not intentionally add or use these chemical substances in the manufacturing or handling of our articles.

Champlain Cable is not obligated to register any articles under REACH, nor is Champlain Cable obligated to seek authorization for substances listed in Annex XIV of REACH.

Please note that the *REACH* directive, specifically the list of SVHCs, is continuously updated by the ECHA. Champlain Cable is dedicated to meeting the requirements of *REACH*. We look forward to continue supplying our customers with quality products. Please contact Champlain Cable should you have any questions or comments concerning the *REACH* directive, our products, and this declaration.
