Champlain Cable Announces RSX Power Cable for Rail Standard RP-585

Champlain Cable is proud to announce the release of its EXRAD® Rail RSX 600V and 2000V rated power cable in accordance with AAR RP-585 and S-501.

EXRAD® RAIL RSX power cables are high-performance XLPO cables conforming to applicable North American and European Rail Transit Standards including AAR RP-585, S-501, and NFPA 130. EXRAD RSX insulation is flexible and provides superior flame retardance, fluid resistance and durability. This new cable series broadens the EXRAD® Rail product family to serve North American and International rail car markets and applications .

Champlain Cable Corporation is a premier manufacturer of Irradiation Cross-linked wire and cable serving the Rail, Automotive, Commercial Vehicle, UL / CSA, Military Shipboard and specialty Data Communication markets. Champlain's products provide cost-effective solutions to wire and cable performance and processing challenges. Champlain is headquartered in Colchester, VT and operates five manufacturing facilities: Colchester, VT, two in El Paso TX, and two in the greater Houston TX area.
