Champlain Cable Releases Data Cable for M24643/84

Champlain Cable is proud to announce the release of its Dataclear™ data cable in accordance with MIL-DTL-24643/84. It is designed to meet the exposed rigors of topside on US Navy / NATO vessels. The high level of shielding is effective in reducing the effects of EMI and EMP while meeting CAT 6A 1-500 MHz transmission spectrum performance. Variants include both water blocked and non-blocked constructions. This cable can be used in exposed locations without conduit or other protective sleeving. This new cable series broadens the Dataclear™ family to both interior and exterior of US Navy/NATO vessels.

Champlain Cable Corporation is a premier manufacturer of Irradiation Cross-linked wire and cable serving the Rail, Automotive, Commercial Vehicle, UL / CSA, Military Shipboard and specialty Data Communication markets. Champlain's products provide cost-effective solutions to wire and cable performance and processing problems. Champlain is headquartered in Colchester, VT and operates five manufacturing facilities: Colchester, VT, two in El Paso TX, and two in the greater Houston TX area.
